STA305/1004 H1S: Experimental Design -
Summer 2021

Instructor: Dr. Ramya Thinniyam

Mini Project - PEER EVALUATION RUBRIC

Complete an evaluation for each group after their presentation. You will mark each group presentation on a scale of 0 to 4 (you can use whole or 0.5 marks, but not other decimals).

	Group Presentation Marking Rubric			
	2	1	0	Mark
Design of Experiment	The design meets the requirements of experimental design that we learned in class and can be realistically carried out. Control, Blocking, Randomization, and Replication were all considered and discussed.	The design meets some of the requirements but some were not clearly explained or design was unrealistic.	The design did not meet any of the requirements (Ex. it was an observational study instead of experimental) or very poorly designed.	
Creativity and Presentation	The presentation was creative, interesting, and easy to understand.	The presentation was somewhat engaging but could be improved in creativity, presentation skills, etc.	I did not find the presentation to be interesting or creative at all.
